More on Transaction(s) Information

1. For e-Filing, each form is treated as 1 transaction, or 1 Payee record.
2. For an ODE file with several Forms IR37 /A/C/D submitted, Payee records within the same file will be grouped into 1 transaction only if they have
 - i. the same tax rate,
 - ii. the same month of payment to Payee
 - iii. the same nature of payment and
 - iv. no claim for any relief/incentive

In other words, for each ODE file submitted, there may be more than 1 transaction being created.

3. If multiple ODE files are submitted, the grouping of records will be done within each file. Grouping does not cross over to records in other files.

View S45 Withholding Tax GIRO Deduction Details

Why group Payees in ODE file into different transaction numbers?

- ODE is designed for payers who file for multiple or large number of Payees , i.e. more than 5 payees per filing
- If all Payee records are being processed as individual transactions, there will be several deductions on the bank statement. For example, if 100 payee records are being processed individually, there will be 100 rows of transactions in the bank statement. Most payers do not want this.

Let's see the illustration in the next 4 slides ->
