1. Who can access View Corporate Tax Notices?

An authorised staff of a company or an authorised staff of a tax agent of the company can access myTax Portal to view the correspondence or Notices for the year of assessment in which the staff has been authorised.

2. My company has been struck off or has amalgamated with another company. Will I still be able to access my Tax Portal for Corporate Tax e-Services and view and/ or download my company's Corporate Tax Notices?

A company ceases to exist when it has been struck off or amalgamated with another company and it is not the surviving entity of the amalgamation. Access to Corporate Tax e-Services, including the "View Corporate Tax Notices" e-Services, at my Tax Portal will no longer be available as there is no further need for these companies to transact with IRAS. Should your company require its Corporate Tax Notices, please arrange for the Notices to be downloaded and saved prior to its strike off with the Accounting and Corporate Regulatory Authority (ACRA) or date of amalgamation.

3. What can I view from View Corporate Tax Notices?

You can view acknowledgement pages from e-Filing and most of the letters (e.g. Certificate of Residence, Notice of Assessment, etc) issued by IRAS.

4. Is the count for read and unread correspondence/ Notices specific to each authorised staff or tax agent?

The count for read and unread correspondence/ Notices is tied to the company or tax agent and not to the respective staff. A document that has been read by any authorised staff of the company or tax agent will be treated as having been 'Read' by the company or tax agent.

5. Is the count for the total number of correspondence/ Notices the same for all staff in a company and for tax agent?

The count for each staff in a company varies according to the years of assessment in which the staff has been authorised to view.

For a tax agent staff, you will only be able to view correspondence/ notices issued by IRAS with effect from the date of authorisation of the tax agent firm.

Examples
