

# INCOME TAX ACT

## (CHAPTER 134)

### INCOME TAX (AUTOMATION EQUIPMENT) RULES 2004

In exercise of the powers conferred by section 7 (1) of the Income Tax Act, the Minister for Finance hereby makes the following Rules:

#### **Citation and commencement**

1. These Rules may be cited as the Income Tax (Automation Equipment) Rules 2004 and shall have effect for the year of assessment 2004 and subsequent years of assessment.

#### **Automation equipment**

2. The automation equipment specified in the Schedule are hereby prescribed for the purposes of the allowances to be made under section 19A (2) of the Act.

#### **Revocation**

3. The Income Tax (Automation Equipment) Rules (R 4) are revoked.

## THE SCHEDULE

Rule 2

### AUTOMATION EQUIPMENT

1. Image or graphics processing equipment, including display, facsimile, optical character reader, laser printer, plotter, image setter, digital printing, direct imaging equipment and scanner.

[S 766/2010, wef 15/12/2010](#)

2. Data processing and information technology equipment, including mainframe, minicomputer, microcomputer, desktop, laptop, mobile phone, personal digital assistant and other information technology devices and peripherals.

[S 766/2010, wef 15/12/2010](#)

3. Data communications and networking equipment, including modem, multiplexor, network processor, servers, interface converter, routers, switches, networks, cabling infrastructure, IP telephony systems, broadband connectivity equipment and security and authentication infrastructure.

[S 766/2010, wef 15/12/2010](#)

4. Information technology software including office system software and software used in connection with provision of any office automation service, enterprise resource planning, customer relationship management such as reservations, registration, queue management, ordering, billings and collections, inventory management, record management, knowledge management, human resource and payroll management, financial information and business management such as accounting and assets management, and personnel business travel request, information and management.

[S 766/2010, wef 15/12/2010](#)

5. Computer-aided design system software and computer-aided manufacturing system software.
6. Surface mount technology machine which is used for the automatic assembly of surface mount devices onto printed circuit boards.
7. Computer controlled machine for cutting and removal operations with automatic tool change capabilities, including CNC lathes, milling machines, EDM wirecut, machining centers, grinders, presses and laser equipment.
8. Unmanned automated guided vehicle which is reprogrammable and used for the transfer of goods or materials within a factory or an office.
9. Co-ordinate measuring machine which is controlled by computer and used for the precise measurement of components for industrial, research or training purposes, including auto in-line vision inspection system and automated testing equipment.
10. Automated system for storage and retrieval of information, including Radio-Frequency Identification (RFID) system and bar-coding system, and Automated machine for the storage and retrieval of goods or materials, which is controlled by computer and installed with automatic retrieval devices.

[S 766/2010, wef 15/12/2010](#)

11. Flexible manufacturing cells consisting of an integrated manufacturing system comprising at least a computer controlled machine and a robot, including assembly robots, robotic systems and auto-packing lines.
12. Automated warehousing equipment and software, including Integrated Transport Fleet Management System, Integrated Warehouse Management System (Radio Frequency Terminals) and Very Narrow Aisle (VNA), automatic material handling, collating and binding equipment, Enterprise Resource Planning systems and Materials Resource Planning and Manufacturer Resource Planning software systems.
13. Automated inspection, testing, packaging and control system for chemicals, pharmaceuticals, medical devices and other automated manufacturing including high speed tableting machines, high speed packaging machines, such as for blister packaging, infra-red probe for control and inspection, vision devices to check mould function or parts inspection, in-mould transfer parts sorting system and analysis equipment for quality control and assurance.
14. Injection mould machines used for making plastic, ceramic or metal components in factory production.
15. Automated chemicals handling equipment, system or line.
16. Computer-to-plate and computer-to-press systems used in drafting and printing business.
17. Automated machinery and systems for food processing and packaging or food preservation.
18. Equipment used in the manufacture (including assembly and testing) of semiconductor wafers or packaged ICs.

[S 766/2010, wef 15/12/2010](#)

19. Automatic equipment used for assembly and testing operations.

[S 766/2010, wef 15/12/2010](#)

20. Automated equipment used in port-related operations.

21. Automotive navigation systems including telematics system and global positioning system.

[S 766/2010, wef 15/12/2010](#)

22. Automated kitchen equipment for the purpose of food processing.

[S 766/2010, wef 15/12/2010](#)

23. Interactive shopping carts or kiosks.

[S 766/2010, wef 15/12/2010](#)

24. Automated drugs dispensing system for healthcare-related operations.  
[S 766/2010, wef 15/12/2010](#)
25. Automated housekeeping equipment including any mattress-lifting equipment for hospitality-related operations.  
[S 766/2010, wef 15/12/2010](#)
26. Automated seating systems for convention or exhibition centre, including retractable theatre-style seating.  
[S 766/2010, wef 15/12/2010](#)
27. Self-climbing scaffold system.  
[S 766/2010, wef 15/12/2010](#)
28. Concrete pumps, whether stationary or mounted on vehicles.  
[S 766/2010, wef 15/12/2010](#)
29. Ride-on power float machine.  
[S 766/2010, wef 15/12/2010](#)

**Made this 11th day of August 2004.**

LIM SIONG GUAN  
*Permanent Secretary,  
Ministry of Finance,  
Singapore.*
